eutelsat  
COMMUNICATIONS

**UNLIMITED ACCESS  
UP TO 1 Mb/s**

## Eutelsat On-board Internet services via satellite

### EUTELSAT@SEA - BROADBAND CONNECTIVITY

**EUTELSAT@sea** service enables you to sustain on- and off-shore communications whether for business or leisure purposes.

We can equip leisure boats, fishing fleets, merchant and government vessels, cruise ships, ferries and yachts for basic communication services such as voice, fax and data transmission as well as whole range of broadband services from e-mail and fax to videoconferencing, video on-demand and telemedicine.

### 2Mbps via EUTELSAT@SEA

**EUTELSAT@sea** is the high-end generation of satellite maritime equipment.

The service is powered by **Eutelsat** through **Skylogic** to provide high-speed Internet access and data exchange.

With a speed rate of 2Mbps **Eutelsat@sea** offers Internet connections faster than a normal ADSL, at very competitive costs.

And this for “**always on**” connectivity, even where the traditional networking systems are unavailable.

### A wide range of data transmission

By installing a **Eutelsat@sea** modem and an antenna we will start you off with the following services:

- Broadband Internet access
- Corporate Intranet access
- E-mail
- Fax
- Electronic weather charts
- Video on-demand
- Media files fast downloading
- Banking
- Voice over IP
- Video conferences
- Newspapers on line
- Telemedicine

### Ideal solution

**Eutelsat@sea** includes all equipment, space segment and high-speed 2-way satellite Internet access for a monthly subscription.

**The superior, easy-to-install, cost-effective broadband connectivity system**
